<p>The monograph presents a brief survey of the conditions of formation of a snow cover and throws light upon prob- lems directly connected with the determination of the state of an already formed snow cover and its param- eters. Considerable space is devoted to the study of the laws of snow deposition in different localities. A dis- cussion of the methods applied to the investigation and (Earth Sciences--Frost, TT, v. 10, no.7) (over)</p>
